# VICTORINOX WATCHES

# MASTER YOUR TIME

Living up to our legacy as Makers of the Original Swiss Army Knife™, we at Victorinox have made it our mission to best prepare you for everyday challenges through smart and masterful solutions.

That's why we employ the same meticulous pursuit of excellence we put in our Swiss Army Knife™ in our watches, too. Why we engineer and manufacture our expertly-selected range of premium watches in our own factory in Switzerland with uncompromising precision and quality down to the last detail. Why every watch is carefully thought-out and comes with intelligent features that serve their purpose perfectly. And why flexibility and innovative material combinations characterize our authentic signature design.

Reliable, versatile and exceeding industry testing standards, our timepieces ensure you are always best prepared to master your time.

Because we truly believe  
**BEING PREPARED MAKES LIFE BETTER.**

# HISTORY

First Cutlery Workshop

Founder Karl Elsener

Mother Victoria

Carl Elsener, Chief Executive Officer

- 1884** Karl Elsener I opens a knife cutler's workshop in Ibach-Schwyz. His mother Victoria actively supports him in his endeavors.
- 1891** Karl Elsener I establishes the Association of Swiss Master Cutlers and delivers the first major supply of soldier's knives to the Swiss Army. The association still exists today.
- 1897** The "Original Swiss Officer's and Sports Knife" is patented. It is known around the world today as the Original Swiss Army Knife™.
- 1909** In memoriam of his mother, Karl Elsener I chooses her first name Victoria as the brand name and registers the emblem with the Cross&Shield as a trademark. Today it is a registered trademark in over 120 countries.
- 1918** Carl Elsener II takes over the management of the workshop.
- 1921** The invention of stainless steel (Inox) is a highly significant development for the cutlery industry. The combination of the two words "Inox" and "Victoria" results in today's company and brand name – Victorinox.
- 1931** Carl Elsener II introduces automation. In 1931, Brown Boveri is commissioned to set up the world's first all-electric hardening plant in Ibach. This guarantees that all knives are of a consistent high quality.
- 1945** The U.S. Army orders a large amount of pocket knives for their post exchange stores. The pocket knives became a popular souvenir for soldiers stationed in Europe after World War II to take home.
- 1950** Carl Elsener III takes over the company management.
- 1977** The Original Swiss Army Knife™ is displayed in the permanent design collection at the Museum of Modern Art in New York.
- 1978** NASA orders 50 Master Craftsman knives, which was one of our most popular Officer's Knives at the time.
- 1979** The "Messerfabrik Carl Elsener" becomes the family-owned company "Victorinox AG".
- 1984** The company doubles its manufacturing and office space.
- 1989** Market entry for "Watches" under its Swiss Army brand in North America with its former U.S. sales partner.
- 1993** Opening of the first sales subsidiary in Japan.
- 1994** Establishment of Carl and Elise Elsener Gut Foundation with the mission to support national and international charitable projects.
- 1999** Market entry for "Travel Gear" with the American TRG Group as licensee.
- 2000** Establishment of the Victorinox Foundation which holds 90 % of the share capital of Victorinox AG. The remaining 10 % belong to the non-profit Carl and Elise Elsener-Gut Foundation.
- 2001** Launch of a clothing line in the U.S. and opening of the first Victorinox store in Soho, New York.

Nenad Mlinarevic, Swiss Chef and brand ambassador for household and professional knives

Watches since 1989

Travel Gear since 1999

Fragrances since 2007

2022: 125 Years SAK Anniversary

- 2005** Acquisition of the long-standing Swiss knife and watch manufacturer Wenger SA in Delémont. Victorinox still operates the Wenger brand, focusing on watches and travel gear items.
- 2007** Carl Elsener IV takes over the company management and further expands Victorinox as a global multi-product brand.
- Establishment of Victorinox Swiss Army Fragrance AG.
- 2008** Opening of the first European Victorinox flagship store in London.
- 2011** Opening of the Swiss Knife Valley Visitor Center in Brunnen, Switzerland.
- 2013** Integration of the Wenger knife business into the Victorinox brand.
- 2014** Acquisition of the travel gear business from the previous licensee and establishment of the new business unit, Victorinox Travel Gear AG.
- Opening of the Victorinox flagship store in the heart of Zürich's city center.
- 2016** Victorinox constructed the Watch Competence Centre in Delémont, Switzerland, expanding its operations with a dedicated team with unique watchmaking experience.
- Wenger brand relaunches focusing on quality for entry price point watches and travelgear.
- 2017** Production of 500-millionth Original Swiss Army Knife™. Discontinuation of Apparel to focus on the core product categories.
- 2018** Karl Elsener I is commemorated on the 100th anniversary of his passing with a special silver memorial medal issued by the Swiss mint.
- The SwissChamp XAVT is featured at the Victoria and Albert Museum's Design Society in Shenzhen, China.
- 2020** Opening of the new European distribution centre in Seewen, Switzerland.
- With the acquisition of Zena Swiss AG Victorinox strengthens its household cutlery offering.
- 2022** 125<sup>th</sup> Anniversary of the "Original Swiss Officer's and Sports Knife".
- 2024** Victorinox launches new website easing shopping experience and underlining its premium positioning.

# SWISS BRAND OUR STORY

When our founder Karl Elsener opened his cutler's workshop in 1884 in Ibach, Switzerland, little did he know that the Swiss Army Knife™ he would soon create would become a global icon of preparedness, not only finding its way into everyday life but even into outer space.

But that's just how life goes: You never know what's coming. All you can do is make sure you are best prepared for whatever comes your way.

Living up to our legacy as Makers of the Original Swiss Army Knife™, we at Victorinox have made it our mission to do exactly that. To best prepare you for everyday challenges.

That's why we responsibly seek well-thought-out solutions that simply serve their purpose expertly. Why we effectively and efficiently deliver uncompromising quality down to the last detail and pursue excellence in everything we do. And why we deliver reliability and authentically Swiss mastery.

So that every single product that bears our famous Cross&Shield – from our Swiss Army Knife™ & Tools and Cutlery to our Watches and Travel Gear – is crafted to perfection.

We do this because we truly believe  
**BEING PREPARED MAKES LIFE BETTER.**

## WHAT OUR BRAND STANDS FOR

How do we help people prepare for whatever comes their way? Through smart and masterful solutions. Because this is how we work and live ourselves.

Our focus is therefore on excellent quality, so that you're in control of your time. We manufacture our timepieces with a high level of expertise. The result is a range of premium watches that give you the certainty of always being precisely on time and in control in every situation.

### BEST-PREPARED

We make sure you're in control of your schedule, thanks to intelligent features that are convincing in every situation.

### SMART

We deliver carefully thought-out solutions, with innovative material combinations and authentic signature design that follows the functions of each watch. Easy-to-change straps and bracelets let you adapt to the moment.

### MASTERFUL

This refined mix of strength and elegance is Swiss made by our experts in our Watch Competence Center in Switzerland. Each precision watch comes with a 5+ years warranty, thanks to extensive in-house testing. This results in uncompromising quality, versatility and quality testing that exceeds industry standards.

# PRODUCT TESTS

Our watches comply fully with both ISO standards and the federation of the Swiss Watch Industry standards (NIHS). In addition, Victorinox has also introduced its own standards and internal tests. We self-monitor our production to make sure each stage is mastered perfectly and that our extensive certification controls are adhered to until delivery. Victorinox also certifies each component that is brought in from external suppliers. The Victorinox Quality Team conducts tests before certifying a design.

## CONFORMITY

Each component entering our production facility in Delémont, Switzerland is checked to verify its dimensions, aesthetics, interchangeability, and physical and chemical resistance to guarantee its impeccable quality. This process is developed by our quality team, who defines standards for each type of component. All this occurs even before the production of a watch begins, thus ensuring the process is fully integrated from the very start.

## MECHANICAL & QUARTZ MOVEMENTS

Movement endures stress and strain throughout its lifetime. To ensure all of our movements remain functional and accurate for as long as possible, Victorinox simulates watch wearing in its own quality lab to test every quartz, manual and automatic caliber in its watches.

## WATER RESISTANCE

Victorinox watch cases are hermetically sealed using high-grade rubber gaskets and screw-in case backs to ensure that the movements are not exposed to moisture or dust. In the manufacturing process, each watch is individually tested for water-resistance with ultra-precise machines.

## TEMPERATURE RESISTANCE

Heat chamber and humidity tests are performed on Victorinox watches to make sure they continue to function perfectly in the tropics. Low temperature tests are also conducted to check that the watch – and more specifically the mechanism – can withstand cold weather conditions.

## CORROSION RESISTANCE

Perspiration, chlorine, soap, seawater, air pollution: these and other environmental factors can damage a watch's components and materials. Victorinox performs tests to make sure the parts in its watches do not suffer wear or loss of mobility due to exposure to corrosive elements. Neutrality and skin sensitization tests are also conducted on all components that come into contact with skin, including cases and all types of bracelets.

## UV RESISTANCE

Intense light and sunlight can damage many materials used in watches, such as coatings, synthetic elements, rubber and leather. These materials are therefore rigorously tested to ensure their durability. Certification is only granted by our Quality Team if no signs of ageing are observed during these tests.

## TRACTION/TORSION RESISTANCE

Buckles on leather straps and clasps on steel bracelets must withstand constant use during a watch's lifetime. Victorinox submits all of its watches to traction and torsion tests, with a particular focus on attachment pins, to make sure they can resist accidental snagging and also that there be no breakage or damage to the bracelet.

## VIBRATION RESISTANCE

Everyday wrist movements and sports such as cycling, jogging, horseback riding or skiing can affect the performance, quality and accuracy of a watch. To prevent this, special machines put Victorinox watches through more severe vibrations than they would ever experience on even the most active of wrists. If a watch or any of its components does not survive this trial, it is not certified.

## SHOCK RESISTANCE

A number of severe shock-resistance tests are performed on Victorinox watches. Heavy impacts – such as the equivalent of a violent collision with a wall, for example – are reproduced in the lab. After absorbing the shock, we make sure that the movement is functional.

## AGE RESISTANCE

Victorinox watches are function-tested to simulate the ageing process. Moving parts such as push-pieces, crowns and bezels are turned and manipulated to replicate several years of normal use.

## ABRASION RESISTANCE

The Quality Team conducts intensive abrasion tests, particularly on cases, bracelets and straps, to make sure our watches can be worn in all situations without suffering premature wear during their lifetime.

## VISUAL AND MANUAL TESTING

In addition to these mechanical and chemical tests, every Victorinox watch is visually checked by a member of the Quality Team between each manufacturing stage to assure its overall quality according to our own Victorinox standards. If a watch does not pass this visual inspection, it is repaired or replaced. All watches that do not pass our quality check are discarded.

# WHAT WE DO FOR SUSTAINABILITY

WE ARE COMMITTED TO INNOVATION, TO CONTINUOUSLY  
IMPROVING OUR CONTRIBUTION TO A BETTER WORLD

## ENVIRONMENTAL – CAREFUL USE OF RESOURCES

We care about the environment, and we reflect that in every aspect of our business. Like using resources wisely to reduce our environmental impact:

### **Product development: recycled materials for high-quality products**

Our core product, the Swiss Army Knife™, is made of up to 85% recycled steel, depending on the availability of scrap steel. Based on this, we are gradually transferring the use of recycled materials to our other product categories.

### **Product packaging: minimal and recyclable**

The guiding principle for our packaging is to use only as much as absolutely necessary. A significant portion is recyclable. We use up to 90% recovered paper in our cardboard packaging, ensuring it's made from 100% chlorine-free bleached paper.

### **Product lifecycle: long-lasting and repairable**

We are so confident about the high quality of our products that we offer a lifetime warranty on our knives, and the warranties on both our travel gear and watches exceed industry standards. For everything else, we offer comprehensive repair and refurbishing options, so the product's lifetime can be extended as long as possible.

### **Operations: energy-saving and innovative**

Across our production sites and offices in Switzerland, we actively seek to reduce our operational footprint. For example: by optimizing waste heat utilization in our production facilities with heat pumps, and through heat recovery from our ventilation and closed-loop cooling systems, we keep our head office in Ibach and 120 nearby apartments warm.

We're pioneers in recycling grinding sludge, having developed a special process to filter steel residue out of the cooling water. We collect around 600 tons of grinding sludge and up to 1,000 tons of scrap steel each year at our premises, returning it to the plant so it can be re-made into steel.

We've installed photovoltaic panels at our Swiss sites, which partially power our facilities while compensating for around 500 tonnes of CO<sub>2</sub> per year.

## **SOCIAL – STRONG COMMITMENT TO SOLID VALUES AND BUSINESS ETHICS**

We are a family business with a long history and a clear vision. Our values guide everything we do, from how we treat our employees, partners, suppliers, colleagues and customers, to how we contribute to society and the environment:

- **Employees:** attractive jobs, fair salary, generous benefits and training opportunities
- **Partners and suppliers:** long-term partnerships, genuine commitment to social and environmental responsibility
- **Support for the Global Climate Expedition:** inspiring young people to save our planet

## **ECONOMIC – SECURING THE FUTURE OF THE COMPANY**

We are an independent family company with a sustainable approach. We have taken steps to ensure the long-term stability and success of our company:

### **Victorinox Corporate Foundation: resolving succession issues and protecting jobs**

Victorinox AG is an independent family company. The Victorinox Corporate Foundation was created in 2000 to resolve future succession issues, secure the company during unfavorable economic times and protect jobs in the long term.

### **Carl and Elise Elsener-Gut Foundation: supporting charitable projects**

The Victorinox Corporate Foundation holds 90% of company shares. The remaining 10% are held by the non-profit Carl and Elise Elsener-Gut Foundation, which was created by the father of our current CEO and supports selected charitable projects both within Switzerland and abroad.

**“Living up to our legacy as Makers of the Original Swiss Army Knife™, our aim naturally is to be successful over the long term by providing compelling products and services on the global market. But protecting and preserving the world for future generations is just as important. We therefore see it as our responsibility to make sure our operations and those of our suppliers support economically, environmentally and socially sustainable goals.”** Carl Elsener, CEO Victorinox AG

## AIR PRO

# PREPARED TO MASTER TIME EVERYWHERE AT ONCE

- Flight-ready timepieces inspired by the world of aviation
- Swiss Made automatic movements with multiple functions
- Accurate timekeeping across multiple time zones

Master time everywhere with the Air Pro flight-ready collection. Combining innovative engineering with timeless Victorinox design, the collection is a powerful partner for your day, wherever it may take you.

Enjoy precision timekeeping immediately with dual crowns for time and GMT functions. Move seamlessly through time zones thanks to the three zone display and embrace your day with the reassurance of superior Swiss engineering and reliability.

# I.N.O.X. CHRONO QUARTZ

## PRODUCT KEY FOCUS POINTS

Shock & magnetic  
resistant

Alox pattern on pushers

Industrial material code

Swiss Super-LumiNova®

Tool-free changable strap

## TECHNICAL SPECIFICATIONS

### CASE

- Ø 43 mm
- Case thickness: 13.4 mm
- Lug Width: 21 mm
- Materials: stainless steel AISI 316L, titanium ASTM Ti-Grade 2, carbon composite PA9T-CF40
- Case back: screw-in

### EXTERNAL PARTS

- Bezel: fixed
- Crystal: anti-reflective coated sapphire
- Crown: protected and screw-down

### INTERNAL PARTS

- Dial: applied indexes, grainy
- Hands: luminescent Swiss Super-LumiNova®
- Markers: luminescent Swiss Super-LumiNova®

### MOVEMENT

- Swiss analogue quartz movement Ronda 5040.E

### STRAPS AND BRACELETS

- Tool free changeable straps and bracelets
- Available in: rubber, wood, stainless steel, paracord

### FUNCTIONS

- Magnetic resistant
- Double antishock protection
- Chronograph and tachymeter functions
- Day of the week and date indication
- Water resistance 200 m / 20 ATM / 660 FT

# JOURNEY 1884

## A JOURNEY OF DISCOVERY

- Shock- and water-resistance up to 200 m
- Magnetic resistant protection on quartz models
- Tool-free changeable strap

Inspired by Switzerland's love of hiking, the Journey 1884 perfectly blends the spirit of the outdoors with its engineering DNA. The Swiss Army Knife™ influenced counterweight and the engraved material code reflect its industrial heritage, which is underscored by the foundation date. Antishock and antimagnetic resistance ensure accuracy, and the easy-change strap adds versatility to its credentials list. High quality materials, clever design detailing and innovative functions make this an essential companion on life's big adventure.

JOURNEY 1884

# MAVERICK FANCY DIVING-INSPIRED TIMEPIECES

- Classy and precise diving-inspired wristwatch
- Features rotating bezel with count-up scale
- Crown protection offers enhanced durability

The Maverick Collection captures the adventurous spirit of the deep-sea diver, where pinpoint timing is a matter of life and death. These stylish watches feature a unidirectional bezel – a function developed for divers to record exact underwater times, and now a mark of the explorer and pioneer, calibrating everyday challenges and tasks. Above or below the waves, the technically precise and visually stunning Maverick watch delivers control and precision to navigate modern life, and is enhanced with sapphire crystal for optimal endurance.

# 5-YEAR WARRANTY +

Our industry-leading “5-Year Warranty +” covers manufacturing and material defects that appear in the course of normal use in the five years after the date of purchase. Additionally, it includes a free replacement battery within the first year after the date of purchase in the event that the battery is defective. The 5-Year Warranty + is effective for all watches sold since the 1st January 2019.

The comprehensive processes implemented by our quality team makes it possible for us to offer this extended warranty. Victorinox watches are subjected to rigorous testing and numerous quality controls before they are distributed. But we also ensure that a watch can be repaired long after the warranty coverage is expired to offer a long-lasting product to our customers. Some numbers on that topic:

Victorinox watches that are subject to a warranty case: less than 2 %

Reparability of quartz watches (after last production): 12 years

Reparability of automatic watches (after last production): 16 years

## ANYTIME SERVICE

We hope that customers never experience a problem with a Victorinox watch, but in the event of a functional defect covered by warranty, the consumer can follow the simple steps below to file a claim. For their convenience, we have a global network of authorized Repair Centers ready to provide service anywhere in the world. Consumers may also follow these same steps to request a repair not covered by warranty:

- Visit [victorinox.com](http://victorinox.com).
- Click on “Info & Support” and then on “Service centers”.
- Enter location and select “Repair Centers” to locate an Authorized Repair Center.
- Contact the authorized Repair Center for assistance.

# CUSTOMER SERVICE

Keeping a Victorinox watch looking its best and working perfectly requires regular servicing. Only authorized Victorinox customer service centers are able to make sure the work carried out meets our standards of excellence.

- each watch sent to an authorized Victorinox service center is handled by a professional watchmaker.
- a diagnostic is performed and a detailed cost estimate made, free of charge (for watches that are no longer under warranty), which is submitted before any repairs are carried out.
- once the customer has accepted the cost estimate, our watchmakers carry out all the necessary procedures, including the replacement of any worn or defective components.

Victorinox guarantees the availability of spare parts for 12 years for quartz and 16 years for automatic watches after production has ended. After servicing, the watch is returned the customer with a one-year warranty on the work carried out.

# MAINTENANCE SERVICES

As it endures daily life, skiing, watersports and sudden variations in temperature, a Victorinox watch requires care and maintenance to make sure it remains reliable and to deliver on its promise of accompanying its wearer on their everyday adventures.

Two types of servicing are available at any of our authorized Victorinox customer service centers.

Every two years, we recommend maintenance servicing. This will ensure that:

- the watch is completely water-resistant (it is dismantled, all the gaskets and the crown are replaced if necessary, the case is cleaned, etc.)
- the movement works correctly (the battery is changed in a quartz watch, mechanical movements are checked and adjusted)

Every six years, depending on the model of the watch, personal use and the local climate, we recommend a complete overhaul. This involves:

- a comprehensive revision of the movement (it is dismantled, the functions are checked, any worn component are replaced, etc).
- water-resistance and accuracy are also carefully verified.

# WATCH CARE TIPS

## OUR ADVICES FOR TAKING CARE OF A VICTORINOX WATCH

Like all quality products, Victorinox watches require attention and care. Following a few basic recommendations will protect the watch over time.

### WATER-RESISTANCE

To prevent the infiltration of water or dust, all watches (quartz or mechanical) should have their water-resistance checked every year by an authorized Victorinox service

center. We recommend having this test done before the summer or before going on vacation, as this is when watches are particularly exposed to water pressure and strong variations in temperature.

METERS	FEET	ATM	USAGE
50	165	5	Suitable for showering or swimming in shallow water
100	330	10	Suitable for swimming or snorkeling
200	660	20	Suitable for scuba diving
300	990	30	Suitable for serious deep water diving, especially if diver's certified (ISO 6425)

#### Certified diver's watch – ISO 6425

For use as a diving instrument, only a watch certified by the strict ISO-6425 standard should be used. This ensures amongst others clear readability in low visibility, shock-resistance, and magnetic protection, regardless of the watch's water resistance.

## HOW TO USE YOUR WATCH IN WATER

**Water resistance classification:** Watches are classified by their degree of water resistance. The water resistance information can be checked on the case back of the Victorinox watch; it refers to the water resistance table on this page.

**Water-resistance guarantee:** The water-resistance of the watch cannot be guaranteed indefinitely. The gaskets may age, crowns or pushers may receive knocks and changes in temperature may weaken water resistance. We recommend a water-resistance test every 18 months at an authorized Victorinox service center or at least every time the case of the watch is opened.

**Important:** Do not operate the pushers or the crown while your watch is underwater. Make sure both are properly pushed back or screwed down.

## MECHANICAL MOVEMENT (MAINTENANCE)

An automatic or hand-wound movement is a miniaturized engine running 24 hours a day, 7 days a week. To sustain its accuracy (between -2 and + 20 seconds per day), it needs regular maintenance and checking.

## CONDENSATION

A sudden change in temperature may cause condensation to appear beneath the crystal. This will not affect the watch's function and will soon disappear on its own. Nevertheless, it indicates a weakness in the watch's water-resistance and we strongly advise taking the watch to an authorized Victorinox service center.

## CLEANING

To preserve the attractive appearance of the watch, it should be washed in slightly soapy water, then rinsed in clean water and dried with a soft cloth. Soft

toothbrush: A toothbrush may be also used to clean the watch. A brush with soft bristles should be used to avoid scratching the watch case or bracelet. Leather strap: To clean the leather strap, it should be rinsed under clean water then rubbed with a soft brush and a little soap. A soft cloth can be used to wipe it. Cleaned leather should be kept away from any source of heat while it's drying.

## SHOCKS

Impact, drops and repeated friction that could wear away the metal and affect the watch's mechanism should be avoided. We recommend removing the watch before playing sports such as tennis, squash or golf, if the watch isn't certified shock resistant.

## TO AVOID

Do not set the date between 21:00 (9 pm) and 03:00 (3 am) when the date mechanism is in action. Be careful to not confuse noon and midnight. Do not expose to chemicals, solvents or gases as they can cause deterioration, discoloration and damage to the case. Do not apply any cosmetics or perfumes directly onto the case, leather strap or metal bracelet. Avoid high temperatures and strong magnetic fields.

## WHILE TRAVELING

Before a vacation: To prevent infiltration of water or dust, the watch needs to pass a water-resistance test every 18 months at an authorized Victorinox service center. At the airport: To protect the watch from magnetism, we advise removing the watch before going through security control. This applies especially on watches which aren't shielded against magnetism (antimagnetic protected).

# COMPONENTS AND MATERIALS

## STAINLESS STEEL

We manufacture cases and components using high-performance AISI 316L stainless steel, which retains its brilliance and beauty over time. The high percentage of chromium and molybdenum makes it resistant to impacts and corrosive elements such as acids, alkalis and chloride, while the low nickel content means it's hypoallergenic and REACH compliant.

Whenever possible, we use recycled steel and repurpose materials that are cut away during production, to lower the use of natural resources. For example, our latest bracelets are made using 89% recycled steel, and the percentage in our case bodies is typically more than 60.

## TITANIUM

Mastering this metal required years of study, testing, hard work and the development of new processes and technologies, but it was worth it. Lighter than steel and denser than aluminum, our titanium is not only strong, durable, and resistant to the elements – it's also biocompatible and hypoallergenic. We use two different titanium grades:

- ASTM Ti-Grade 2 is unalloyed 99.2% titanium, the purest used in our watch-

es, with traces of iron, carbon, nitrogen and oxygen. This makes it ductile and corrosion-resistant, ideal for a brushed or sandblasted finish.

- ASTM Ti-Grade 5 is an alloy of 89.2% titanium, 6% aluminum and 4% vanadium, with traces of iron, carbon, nitrogen and oxygen. Its composition makes it even stronger and harder, ideal for polished parts like bezels.

## CARBON

We use only high-quality Swiss Made Carbon Composite of the PA9T-CF40 family. Its long carbon fibers (40%) reinforced by aromatic polyamide resins makes it extremely light, strong, durable, and hypoallergenic. Its stiffness, even at high temperatures, and resistance to heat, chemicals, scratches, abrasions, and creep (i.e. to harsh environments and sustained stress), make it ideal for complex and precise shapes such as our case body or bezels. It features a subtle marbled effect making each piece unique.

## PVD (PHYSICAL VAPOR DEPOSITION)

Widely used in watchmaking, PVD is a high-performance, pollution-free and non-allergenic technology that is also

employed by the aeronautic industry. The process involves adding a titanium coating to stainless steel by condensing a metal vapour in a partial vacuum, thus circumventing electrolytic and chemical processes.

### SAPPHIRE CRYSTALS

All Victorinox watches are fitted with a scratch-resistant crystal glass cut from a polished slice of solid sapphire. Each one is triple-coated with an anti-reflective treatment on the internal side for enhanced legibility.

### GENUINE MOTHER-OF-PEARL

Resilient and iridescent, genuine mother-of-pearl features in several Victorinox dial designs. Genuine mother-of-pearl is produced inside the shells of certain molluscs, meaning that each dial adorned with mother-of-pearl is utterly unique.

### BATTERIES

Victorinox equips its quartz watches with mercury-free Swiss made batteries in compliance with global regulations and standards. This positive step towards environmental sustainability has no effect on either the precision or efficiency of a quartz watch. Each battery has an estimated lifespan of 2 years.

### LUMINESCENCE

This technology, branded as Swiss Super-LumiNova®, offers enhanced brightness in low-light conditions thanks to a non-radioactive and non-toxic substance. Victorinox uses Swiss Super-LumiNova® for any highly functional features of its watches, usually applying it to components such as the hands, numerals or bezel markers, etc.

# MOVEMENTS

All movements used in our watches are Swiss Made. We mainly use the following two suppliers:

## SELLITA:

A vital pillar of the Swiss watchmaking industry that was founded in 1950, SELLITA has a long tradition in the assembly, design and manufacture of quality mechanical movements. We use its movements for a variety of our mechanical watches.

## RONDA:

RONDA is one of the world's leading manufacturers of highly innovative, precision electronic watch movements, which form the foundation of many of our watches.

## LA JOUX-PERRET:

La Joux-Perret is a Swiss leader in high-end watch movement manufacturing (mostly mechanical), known for blending traditional craftsmanship with cutting-edge innovation to power some of the world's most prestigious timepieces. As part of the Citizen Group, La Joux-Perret offers exceptional quality and reliability, delivering sophisticated movements trusted by elite brands and collectors globally.

# STRAPS AND BRACELETS

## LEATHER

All Victorinox leather straps are specially cut, stitched and lined by expert craftsmen. Various tanning techniques provide different textures and feels for our cowhide or calfskin straps. We also ensure that none of the leather used in our straps is sourced from endangered species. It is always important to note that the colours and suppleness of leather are subject to change with time and exposure to external factors. Exposing it to daily showers or swims is not recommended. We recommend that customers who live a very active lifestyle, especially one involving frequent exposure to salt water and/or heavy perspiration, opt for a steel bracelet or rubber strap.

## STAINLESS STEEL

The 316L stainless steel alloy used in Victorinox bracelets has strong antimagnetic properties and is optimized for toughness and corrosion resistance.

## MILANESE MESH BRACELETS

Stainless steel Milanese mesh bracelets are flexible, thin and easy to adjust, enabling the owner to adapt the size of their own bracelet without the need for any specific tools.

## GENUINE RUBBER

Victorinox uses genuine high-grade rubber for its straps, a natural and extremely comfortable material with a silky finish that is as resistant to ageing as silicone.

## BALLISTIC NYLON

Some Victorinox models are equipped with ballistic nylon straps, which also features in our of most exclusive line of travel gear. It provides the ultimate in reliability and durability.

## PARACORD STRAPS

The paracord strap is original, innovative and unique. Hand-woven from genuine American-Made certified parachute cord (highly resistant, multistrand nylon cord), it is the ideal companion for every adventure and expedition. Paracord straps can be unwoven and used for as many purposes as the wearer can possibly imagine.

## SBB (STRAPS & BRACELETS BASE)

Our easy-to-use SBB references are available in our Media Centre and are regularly updated. This practical database enables you to find the strap reference your customer needs quickly (metal bracelet, leather, rubber, paracord or any of our available straps) and look up compatible straps for every watch SKU launched since 2005. Information about how to download a digital version from out Media Centre can be provided.

241951	<b>Maverick Quartz</b>	59	7613329143209	Ronda 715	-	43	11.4	21	006360
Case: Stainless Steel, Silver, Brushed   Bezel: Stainless Steel, Rose Gold, Polished   Bezel insert: Mineral Crystal, Brown, Polished   Unidirectional Rotating Bezel   Dial: Brown, Brushed, Military Time 24h   Crystal: Sapphire   Case back: Stainless Steel, Screw-In Caseback   Bracelet: Stainless Steel, Silver/Rose Gold, Polished/Brushed   Closure: Stainless Steel, Double-Locking Safety Clasp, Diver Extension   Water resistant to: 10 ATM/100 M/330 FT   Battery Nr.: 371									
241934	<b>Maverick Quartz</b>	59	7613329143216	Ronda 715	-	43	11.4	21	006355
Case: Stainless Steel, Silver, Brushed   Bezel: Stainless Steel, Silver, Polished   Bezel insert: Mineral Crystal, Green, Polished   Unidirectional Rotating Bezel   Dial: Green, Brushed, Military Time 24h   Crystal: Sapphire   Case back: Stainless Steel, Screw-In Caseback   Bracelet: Stainless Steel, Silver, Polished/Brushed   Closure: Stainless Steel, Double-Locking Safety Clasp, Diver Extension   Water resistant to: 10 ATM/100 M/330 FT   Battery Nr.: 371									
242094	<b>Maverick Quartz</b>	61	7611160355164	Ronda 715	-	39	11.3	21	007319
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Blue, Polished   Dial: blue, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Rubber, blue   Closure: Stainless steel, Regular buckle   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242095	<b>Maverick Quartz</b>	61	7611160355171	Ronda 715	-	39	11.3	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: silver, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Blue, Polished   Dial: blue, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242096	<b>Maverick Quartz</b>	61	7611160355188	Ronda 715	-	39	11.3	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Green, Polished   Dial: green, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242097	<b>Maverick Quartz</b>	61	7611160355195	Ronda 715	-	39	11.3	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Black, Polished   Dial: black, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242098	<b>Maverick Quartz</b>	62	7611160355201	Ronda 715	-	39	11.3	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Red, Polished   Dial: red, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242099	<b>Maverick Quartz</b>	62	7611160355218	Ronda 715	-	39	11.3	21	007320
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, gold, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Black, Polished   Dial: black, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Rubber, black   Closure: Stainless steel, Regular buckle   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242100	<b>Maverick Quartz</b>	62	7611160355225	Ronda 715	-	39	11.3	21	007323
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, gold, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Blue, Polished   Dial: blue, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver/gold, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242101	<b>Maverick Quartz</b>	62	7611160355232	Ronda 715	-	39	11.3	21	007323
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, gold, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Green, Polished   Dial: green, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver/gold, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242102	<b>Maverick Quartz</b>	62	7611160355249	Ronda 715	-	39	11.3	21	007323
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, gold, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Black, Polished   Dial: black, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver/gold, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242103	<b>Maverick Quartz</b>	62	7611160355256	Ronda 715	-	39	11.3	21	007323
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, gold, Polished   Bidirectional rotating bezel   Bezel insert: Mineral crystal, Ice Blue, Polished   Dial: Ice Blue, Sunray brushed   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback   Bracelet: Stainless steel, silver/gold, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: 371									
242104	<b>Maverick Automatic</b>	65	7611160355263	Sellita SW 200-1	38 h	39	11.8	21	007320
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Ceramic, Black, Polished   Dial: black, Lacquered   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback, See through caseback   Bracelet: Rubber, black   Closure: Stainless steel, Regular buckle   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: -									
242105	<b>Maverick Automatic</b>	65	7611160355270	Sellita SW 200-1	38 h	39	11.8	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Ceramic, Black, Polished   Dial: black, Lacquered   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback, See through caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: -									
242106	<b>Maverick Automatic</b>	65	7611160355287	Sellita SW 200-1	38 h	39	11.8	21	007322
Case: Stainless steel, Silver, Brushed   Bezel: Stainless steel, silver, Polished   Bidirectional rotating bezel   Bezel insert: Ceramic, Blue, Polished   Dial: blue, Lacquered   Crystal: Sapphire, Anti-reflective coating   Case back: Stainless steel, Screw-in caseback, See through caseback   Bracelet: Stainless steel, silver, Polished-brushed   Closure: Stainless steel, Deployant clasp   Water resistant to: 20 ATM/200 M/660 FT   Battery Nr.: -
